📍 Nanded, Maharashtra, India

Professional Summary

Results-driven Full Stack Developer and M.Sc Computer Science candidate (SRTMU) with a strong academic foundation (8.0 CGPA) and hands-on experience building end-to-end web applications using the MERN stack. Demonstrated ability to architect and deploy production-ready platforms featuring real-time tracking, AI-powered chatbots, RESTful APIs, and cloud integrations. Passionate about writing clean, scalable code and delivering intuitive user experiences. Actively seeking a software engineering internship or junior developer role to contribute to high-impact products.

Technical Skills

Languages:	JavaScript (ES6+), Java, Python, SQL, HTML5, CSS3
Frontend:	EJS, Responsive UI/UX Design, Animation Libraries
Backend:	Node.js, Express.js, RESTful API Design, MVC Architecture
Databases:	MongoDB, SQL (relational databases)
DevOps & Tools:	Git, GitHub, Docker, Cloudinary, Postman
Stack:	MERN Stack (MongoDB, Express, React/EJS, Node.js)
Concepts:	Real-Time Systems (Socket.io), Authentication & Authorization, CRUD Operations, Cloud Storage Integration, AI Chatbot Integration

Projects

T2YD — Goods Transport & Truck Booking Platform | *Node.js, Express, MongoDB, EJS, Socket.io, Google Maps API*2023

- Architected and delivered a full-featured logistics web platform enabling shippers to post loads, browse available trucks, and submit competitive bids — reducing manual coordination overhead end-to-end.
- Engineered real-time GPS tracking module using map APIs, providing live vehicle location visibility to shippers and fleet managers throughout the delivery lifecycle.
- Built a bidirectional real-time chat messaging system between shippers and truck operators using WebSocket technology, eliminating the need for third-party communication tools.
- Integrated an AI-powered chatbot for contextual help and feedback collection, improving user onboarding and reducing support queries.
- Implemented role-based dashboards for admins, shippers, and drivers with features including load posting, truck assignment workflows, notification system, profile management, and multi-language support.
- Followed strict MVC architecture, ensuring separation of concerns, maintainability, and scalability across the codebase.
- GitHub:** github.com/Shivamkadam692/T2YD

BookH — Hotel & Villa Booking Platform | *Node.js, Express, MongoDB, EJS, Cloudinary, Passport.js*2024

- Developed a full-stack hotel and villa booking platform with complete CRUD operations, enabling property owners to list accommodations and guests to browse, review, and rate properties.
- Implemented secure user authentication and session management using Passport.js with hashed credentials, protecting user data and preventing unauthorized access.
- Integrated Cloudinary for cloud-based image storage and transformation, enabling property owners to upload, manage, and serve optimized listing images at scale.
- Designed and built a dynamic review and rating system with data validation, allowing verified guests to submit structured feedback tied to their booking records.
- Structured the application with MVC pattern for clean code organization, enabling rapid feature iteration and straightforward debugging.
- GitHub:** github.com/Shivamkadam692/BookH

Personal Portfolio Website | *HTML5, CSS3, JavaScript, Custom Domain Deployment*

2023

- Designed and deployed a personal portfolio website with a responsive, mobile-first UI/UX, smooth CSS animations, and custom domain — serving as a live showcase of engineering work.

- Optimized for cross-browser compatibility and performance, achieving fast load times and seamless rendering across all screen sizes.
- **Live:** shivamkadam.online

Education

Master of Science — Computer Science	Aug 2024 – May 2026
<i>CGPA: In Progress</i>	<i>Swami Ramanand Teerth Marathwada University (SRTMU), Nanded</i>
Bachelor of Science — Computer Science	Aug 2021 – May 2024
<i>CGPA: 8.0 / 10.0</i>	<i>Swami Ramanand Teerth Marathwada University (SRTMU), Nanded</i>

Certifications & Training

MS-CIT	Government-recognized computer literacy certification, Maharashtra State Board
Advanced Excel	Data analysis, pivot tables, VLOOKUP, and formula-based automation
Video & Content Editing	Self-directed upskilling in multimedia content production and post-processing

Experience

Open to Internship / Junior Developer Roles	2026
<i>Fresher</i>	<i>Actively seeking first professional software engineering position</i>
• Built and independently deployed two full-stack production-grade platforms (T2YD, BookH) demonstrating end-to-end engineering competence across backend, frontend, database, and DevOps layers. • Contributed to personal open-source repositories on GitHub, maintaining clean commit history, modular code structure, and technical documentation. • Consistently expanded technical skills through self-directed learning in Docker, AI integration, real-time systems, and cloud infrastructure to align with industry hiring expectations.	

Achievements & Highlights

- Graduated B.Sc Computer Science with **8.0 CGPA** — consistently among top academic performers in the department.
- Designed and deployed **2 production-ready full-stack platforms** independently, covering logistics and hospitality verticals, demonstrating full product lifecycle experience.
- Integrated **AI chatbot, real-time GPS tracking, and live messaging** into a single platform (T2YD), showcasing ability to incorporate emerging technologies into practical applications.
- Successfully set up **custom domain deployment** for personal portfolio, demonstrating familiarity with DNS configuration, hosting, and production release workflows.
- Proficient in **three languages** (Marathi, English, Hindi) — enabling effective cross-functional collaboration in multilingual team environments.

Languages

Marathi — Native **English** — Native / Professional Proficiency **Hindi** — Native
